

MARTIN SEWELL — CURRICULUM VITAE

PERSONAL DETAILS

Name:	Martin Sewell	Title:	Dr
Address:	34 St Matthew's Gardens CAMBRIDGE CB1 2PJ	Date of Birth:	6 November 1968
		Place of Birth:	Reading, United Kingdom
		Nationality:	British
		Health:	Excellent
Mobile:	07974 145461	Email:	martin@martinsewell.com

HIGHLIGHTS

- **PhD in machine learning/financial markets**
- **Cambridge postdoc**
- **quant trader**
- **blockchain research**
- **ultramarathon runner**

ACADEMIC ACHIEVEMENTS

Apr. 13 – Jan. 16 Member of the **Postdocs of Cambridge** (PdOC) Communications and Events Subcommittees. Organised many events including leading a Postdocs of Cambridge team to successfully complete a Tough Mudder event, plus led a hiking trip to Snowdonia with 34 hikers. Also led a hike up Helvellyn via Striding Edge, took 26 postdocs up Ben Nevis and helped navigate the Yorkshire Three Peaks. A founding member and the **Treasurer of Entrepreneurial Postdocs of Cambridge** (EPOC).

Sep. 12 – Sep. 13 Postdoctoral Member of **Clare Hall, University of Cambridge**. On the Clare Hall May Ball 2013 committee.

Jan. 00 – Nov.08 **University College London** *PhD in Application of Machine Learning to Financial Time Series Analysis*. The research was motivated by the following thesis question: 'Can one improve upon the state of the art in financial time series analysis through the application of machine learning?' Registered as a full-time student, but at times worked part-time or full-time in parallel.

Oct. 93 – Sep. 94 **Birkbeck College, University of London** *Degree of MSc in Computing Science*

Oct. 87 – Jun. 90 **University of Bristol** *Degree of BSc with Honours in Mathematics*

Sep. 82 – Jul. 87 Sharnbrook Upper School and Community College *10 O levels, 4 A levels*

EMPLOYMENT

Jan. 16 – present **Research and Development Specialist** at **nChain**. Conducting research in cryptography, blockchain technologies, cryptocurrencies (primarily Bitcoin) and writing white papers detailing innovations suitable as source documents for patent preparation. Also writing peer-reviewed journal publications and some development in C++ and Python.

Jan. 15 – Jun. 15 **Supervisor** for the Computer Laboratory, **University of Cambridge**, teaching *1B Computation Theory* and *1B Concepts in Programming Languages* for Girton College and Pembroke College.

Feb. 13 – present Undertook four research projects for **CAX Capital**. Project 1: Forecasting M&A (18 days), Project 2: CAX Cambridge Research Centre (5 days), Project 3: Analysis of Quant Capital, Part 1 (Q1 2014) (14 days), Project 4: Analysis of Quant Capital, Part 2 (Q1 2014) (16 days). Plus other contract work, wrote a literature review on systemic/country risk modelling. Working for **Titan CXi** on a start-up in the financial services industry. Helped **Cambridge Coding Academy** design a Machine Learning module as part of a course on Practical Data Analysis.

Jan. 02 – Jan. 13 Creator, developer and proprietor of **Tenancy-Agreements.co.uk**. Negligible time commitment. Sold business to Canonbury Management.

Aug. 12 Gave supervisions and took students on day trips as part of the *Cambridge Horizons Programme* at the University of Cambridge run by **Cambridge Educational Horizons**. The two-week residential course includes seminars on real estate

- economics, basic real estate valuation principles, real estate development and financial modelling for real estate.
- Apr. 10 – Jul. 12 Member of the Steering Committee of the **E3 Foundation**, a think-tank based in Cambridge, with editorial responsibility. The think tank develop policy solutions to the interconnected economic, energy and environmental problems that threaten future global prosperity. Unpaid.
- Apr. 12 – Jul. 12 Worked on a **Temporary Worker** contract for the Centre for Risk Studies at **Judge Business School**, University of Cambridge, on the Supply Chain Project. Reviewed publications on supply chain networks taken from the operations management literature, with an emphasis on risk. Helped model a supply chain from the automotive industry. Helped model the distribution side of a laptop supply chain, modelled an illustrative supply chain from the German automotive industry, sourced data for input-output tables and constructed a worldwide city dataset.
- Jan. 12 – Jun. 12 For two terms, worked as a **Supervisor** in the Faculty of Economics, **University of Cambridge**, providing undergraduate supervisions to 27 students for the Economics Tripos. Specifically, *Part I, Paper 3: Quantitative Methods in Economics* (Mathematics) (for Homerton College and Newnham College) and *Part IIA, Paper 3: Theory and Practice of Econometrics I* (for Newnham College, Queens' College and St Edmund's College).
- Jan. 12 – Feb. 12 Gave tutorials and took students on day trips as part of the two-week residential *Introductory Real Estate Finance Seminar* at the University of Cambridge run by **Cambridge Educational Horizons**.
- Mar. 09 – Sep. 11 **Senior Research Associate** at The Cambridge Centre For Climate Change Mitigation Research (4CMR), Department of Land Economy, **University of Cambridge**; working on climate change mitigation research for the Three Guineas Trust research project. The focus of the work was on econometric modelling of energy, the environment and the economy at the global level, using Fortran, IDIOM and Ox. Raised funds on two occasions, from Quant Capital and from E3G. Fixed term contract.
- Jun. 10 – Oct. 10 A **Quantitative Arbitrage Researcher** for **Quant Capital**, a New York-based hedge fund that focuses on merger arbitrage. Ran the research office in Cambridge. Performed a thorough literature review, the primary goal of which was to seek domain knowledge in order to optimally select relevant independent variables for a regression analysis that forecasts M&A-related activity. The other important goal was to assess the performance of the various linear and non-linear methods employed in the literature, e.g. linear discriminant analysis, logistic regression, artificial neural networks, etc. Hedge fund closed due to funding difficulties.
- Feb. 10 – May 10 As a remote contractor, wrote risk management software in MATLAB for **eStats Capital**, a fully automated, high frequency, short-term trading business located in Sydney.
- Nov. 05 – Jul. 07 A quant with the statistical arbitrage hedge fund **Cirrus Capital** in London. Paid expenses only.
- Jan. 05 – Mar. 05 As below, but part-time and mostly GIS (geographic information system).
- Oct. 04 – Nov. 04 **Temporary programmer** in The School of Water Sciences, **Cranfield University**. C++ programming for the TiGrESS project. Full time.
- Aug. 99 – Oct. 01 Worked for **Hurst Consulting** at Ladbroke's Head Office.
- Jan. 99 – Dec. 00 Researching academia for the Society of Technical Analysts. Paid expenses only.
- Jan. 99 – Apr. 99 Attended **STA Diploma** Course and passed exam at Southbank University.
- Jul. 97 – Sep. 97 Studied and passed **SFA Futures & Options Representative Examination**.
- May 97 – Jun. 97 Returned to work for OCM Ltd to help sort things out. Company ceased trading.
- Jan. 97 – Feb. 97 **Spot FX Trader's Assistant** with **OCM Ltd** in Gerrards Cross. Traded interbank Spot FX including cross currencies for institutional clients. Responsible for the whole of the back office and all operations. Wrote back office system.
- Apr. 96 – Jun. 96 **Assistant Coffee Trader** with **Truxo Coffee Limited**. On the physical trading desk, responsibilities included FX, keeping our position and back office work. Also spent time on the London Commodity Exchange floor.
- Jul. 95 – Jan. 96 A **Spot FX Trader** with **Prime Forex Limited**, London. Commission only.

Jan. 92 – Sep. 93 R & D Technician for **Unilever Research**, at their Colworth Laboratory. Worked on Lipton Ice Tea and also developed the tetrahedral tea bag. Left in order to pursue master's degree.

COMPUTING

Hardware: PCs (10 years), DEC VAX-6310, Sun SPARCserver 470, BBC Model B (3 years)
OSs/Guis: KDE, Linux, MS-DOS, UNIX, VAX/VMS, Windows (10 years)
Languages: machine code; assembly language (6 months); BASIC (3 years), C (3 years), C# (1 year), C++ (5 years), COBOL (6 months), FORTRAN (1 year), IDIOM (1 year), Java, LISP, Pascal (1 year); MATLAB (2 years), MySQL, Ox, Python, R (6 months), SQL (1 year), Visual Basic (3 years)
Applications: Access (2 years), ArcGIS (6 months), Cajá (3 months), Excel (10 years), Harvard Graphics (1 year), Lotus 1-2-3, MapInfo, PostgreSQL, Smart, Sun Accounts, TradingSolutions (6 months), Word (10 years), WordPerfect, Works (3 years)
Web: HTML (5 years), XHTML (5 years), CSS (5 years), PHP (5 years), JavaScript

SOFTWARE

[SVM_{dark}](#) in C for Win32
[winSVM](#) in C++ for Win32
[formatlibsvm](#) in C++
[Fisher kernel](#) in C++
[Order book reconstruction](#) in C#
[Rescaled range analysis](#) in C++
[Fractal image compression](#) in C

EXCEL/VBA

[Rescaled range analysis](#)
[Monte Carlo portfolio optimization](#)
[Portfolio performance measurement](#)
[Kelly criterion](#)
[Cumulative prospect theory calculator](#)
[Performance metric analysis](#)
[Runs test](#)

WEB-BASED SCRIPTS (PHP)

[Buy/Sell Investment Tool](#)
[Money management](#)
[Cumulative prospect theory calculator](#)
[Return and Volatility Converter](#)
[Portfolio performance measurement calculator](#)
[Significance test](#)

FINANCE

Equities: PhD thesis includes a statistical analysis of stock markets, and an artificial stock market is developed. Work at Quant Capital was purely equity-based.
Futures: eStats Capital trade futures markets.
Foreign exchange: Prime Forex, OCM Ltd and Cirrus Capital traded FX. PhD thesis forecasts six FX markets using five machine learning models and daily data.
Commodities: Worked on the physical desk at Truxo Coffee. During research for PhD, built trading systems to forecast the price of gold and silver on a daily basis.

INTERESTS

Efficient market hypothesis, technical analysis, behavioural finance, trading, machine learning, kernel methods, support vector machines, multiagent systems, philosophy of science, probability, Bayesian inference, evolution, evolutionary psychology, market microstructure, climate change, climate change mitigation, econometrics, obstacle racing, running (including marathons, trail marathons and ultramarathons).
